Figure 2 Workshop online

This training event was originally planned to take place face to face, but finally conducted in hybrid form, that means online and “offline” simultaneously.

The event included:

- 1 keynote on ‘ICT in Education’
- workshop themes
- roundtable discussions
- interactive game sessions
- student presentations
- lectures

- offline cultural events, guided tours, city walks, and museum & industry visits.

The goal of the Training workshop was to familiarise partners with educational and entrepreneurial aspects in the T-Crepe project and more analytically:

For Students:

- to learn more about the Design Thinking methodology and mindset
- to learn how to create a ChoiCo games to help them to make the best decisions in developing their course project

For Teachers:

- to find out how the T-Crepe planet supports them in coaching and evaluation
- to learn how ChoiCo games can help the students to make choices in project development
- to Experience the power of new educational tools

For Industry:

- to learn how the Design Thinking methodology can be a way for (re)training employees to develop innovative, marketable products and services
- how contemporary (textile) industry projects and challenges make their way
- to create ideas, and develop as real products in the marketplace
- to learn how digital technologies can help your textiles business or company
- to share ideas related to textiles to raise awareness on key issues in the field
